Dr. Lester Horne arrived here last week from Dublin, Ireland, where he has been taking a special course in surgery during the past few months. No basket ball game this week. School commences Monday, Jan. 5 and West Paris will meet Norway High quintet at Norway Opera House on Jan. 9. The public is giving the school boys fine support as a large attendance at the games has been the rule since the home schedule opened. Securing the Imperial Singing Orchestra for dancing after each game has proved good business, as amusement shows.

Mr. and Mrs. Ashley Edwards were the Christmas guests of Mr. and Mrs. Willis Edwards at South Paris.

The dancing party given at Norway Opera House Christmas afternoon and evening was a social success. Although not a large number gathered in the afternoon, owing to family reunions and other causes those present thoroughly enjoyed the time. Nearly one hundred couples were on the floor in the evening and a good sized balcony attendance was noted. Excellent music was furnished by the Imperial Singing Orchestra of eight pieces. Floyd Haskell has taken Ernest Page's place in the male quartet and Frank Knapp, the well known cornetist, has joined the team for a long engagement.

Western Maine Poultry Association will hold their eleventh annual exhibition at Norway Opera House, Jan. 6, 7, 8. Arrangements are being completed to handle one thousand birds if every poultry raiser will realize the importance of getting their show stock before the public. Last season the association listed about nine hundred birds and that was at an unfavorable period following the flu with its depressive influence. All the big poultry men are coming this year with blue blood and prize winners. This is a comparison show and three days spent here looking 'em over will be worth many dollars to any real poultry breeder looking for progress.

Mrs. Cloe Elizabeth Sawin, widow of Thomas Hubbard Sawin, passed away Thursday afternoon, Dec. 25, at the home of her daughter, Mrs. Bertrand G. McIntire, Crescent Street. Mrs. Sawin was the daughter of John and Cloe Bisbee Sampson and was born in Waterford, July 17, 1841. She married Mr. Sawin of Waterford Oct. 12, 1859 and they occupied a farm a number of years before he was engaged in trade at North Waterford village. Luck and Mrs. Sawin went to East Waterford to live with her daughter, Mrs. B. G. McIntire. She resided in Norway since the family came to the village some eighteen months ago and had become a prominent worker in the Universalist society and a staunch member of the church. She was a member of Evergreen Rebekah Lodge at Waterford.

As a young man he assisted his father with the work on the farm. He enlisted during the Civil War, and was a member of Company F, 23d Maine Regiment. After his discharge he engaged in the livery business at West Paris. He married Persis A. Child of Paris, March 4, 1868 and they celebrated their fiftieth wedding anniversary last March.

For a time Mr. Walker worked at the John M. Cummings livery stable, later entering the employ of the B. F. Spinney Shoe Co., where he worked for many years. They bought the Joel Crooker stand on Bridge street, where they lived for eighteen years, when they purchased the Blake stand on Cottage street, which they sold nearly four years ago and bought the George Herrick place on Maple street.

After leaving the shoe factory Mr. Walker engaged in light farming. He was a member of Harry Rust Post, No. 54, Norway Lodge, No. 16, I. O. O. F., and Wildey Encampment, No. 21. Mrs. Holden was a member of the Norway Methodist church and also of the New England Order of Protection. She was 65 years of age and her parents were Joseph and Jane (Whitehouse) Merrill. ONE WAY TO FAME

Fame is very easily acquired. All you have to do is to be in the right place at the right time and do the right thing in the right way—and then advertise it widely.

An appeal to remember the famished birds in this cold weather when their natural food is unattainable, being frozen or snow-covered, has been sent out. Crumbs, scraps and bits of suet would be a repast to set their almost frigid little hearts a throbbing to its glad old tune. Instead of lugging the table scraps to the garbage pail just scatter them outdoors, and the birds will see to it that they disappear in a short time.

McGinley Throws Taylor

One of the strongest, hard fought battles in the history of the local wrestling game was witnessed by a good sized crowd of enthusiastic fans, Tuesday evening, Dec. 30 at the Norway Opera House. W. Frank Stairs promoted the show. McGinley won over Kid Taylor of Waterville in the main bout and passed out a surprise to many people in this locality who had failed to realize the South Paris boy was gaining a place among the leaders in his class.

Young Culbert of Bolster's Mills and Harold Gagnee of Welchville were the first pair to open on the mat with Homer Truman, referee. Culbert won best two out of three, time seven and twelve minutes respectively. The arm lock and half Nelson was used in both falls.

One more man was passed to Mike Nadir, the Syrian terror, in the person of Adna Buck of Norway. Mike won out in nine and seventeen minutes, doing the trick with the toe hold and full Nelson. Both rounds went along quickly and seldom was the Syrian thrown strictly on the defensive. What Buck lacked in skill he made up in beef and grit. Mike's experience in breaks served him to advantage in several tight squeezes as his robust antagonist had him in a number of vise-like holds close to the danger zone. After the decision Farmer Doughty of Norway passed out a challenge to the winner which Nadir gladly accepted.

The main bout featuring Frank McGinley of South Paris and Kid Taylor of Waterville for a $25 purse was a long drawn out show between a pair about fifty-fifty in skill Taylor has a big reputation for speedy goods and a clean way of passing them over the counter. McGinley although lacking the mat experience of his opponent, proved equally clever and honest in his dealings. He had the Waterville boy stalled on strength and showed marked advantage at every turn when a muscle battle started.

The main show was a surprise to many as few realized the long distance traveled by the South Paris champion the past year or more. Physical training has put McGinley into a fast class of wrestlers and a good man will have to be selected if the young college chap is to be pinned down for the count.

McGinley secured the first fall in 47 minutes after a long mill drawing heavily on the wind of both gamesters. In the second bout another long session was given and an all night exhibition seemed evident. At the end of 38 minutes Taylor weakened and fully realized he was not the man to carry away the purse on this trip. After the Waterville boy surrendered and quit the mat Referee Truman awarded the round and bout to McGinley. Weighing in after the show gave McGinley a mark three pounds less than at the beginning. It was a hard struggle when both broke from easy hold and gave one of the best and cleanest on the level fights since the Truman Sherburn match some two years ago.

Promotor Stairs will stage another star performance the second week in January.

Tom Raymond Will Promote Wrestling

That well known shoe maker and versatile sportsman, Tom Raymond of Lewiston, formerly a foreman in the Carroll, Jellerson Co. factory, is in the wrestling game.

In a communication to Bob Seavey at Beals Tavern Tom comes across with a desire to inject new blood into the wrestling game at Norway. He is willing to bring Kid Boldue and Tremblay, the world's light weight claimants into Norway Opera House for a $75 purse, winner take all, best two out of three with a $100 side bet. Furthermore he will bring Charles E. Metro of Boston into town to meet Homer Truman, the Maine Champion. In this match $75 will go to the winner, best two in three with another $100 side bet.

Tom is willing to play each event separately, but would prefer to stage both on the same card and make one bang up good show.

This is a real offer free from inflated values. If the people in Norway and vicinity want live stuff backed by Raymond and other sportsmen they can have it.

Tom Raymond is at the Mayflower Shoe Co., Lisbon street, Lewiston, where he officiates as one of the successful proprietors.

Mrs. Archie Gurney has returned from the C. M. G. Hospital and is receiving medical treatment. Mrs. C. W. Merrill is assisting with the housework.

Homer Truman, the Maine champion wrestler and his manager, W. Frank Stairs, are at Rumford to participate in a New Year's sporting exhibition. Truman will clash with one of the best athletes in his class.

Two years ago this (1917) we were passing through a cold weather experience duplicated only at the north pole. The week opened at 26 to 40 degrees below zero and continued until Jan. 3, with readings from 10 to 42 below, all taken at 7 a. m. High wind prevailed Dec. 29, 30, 31, with a temperature below the zero point at high noon. The snow fall for the month of that year gave us 12 to 14 inches Dec 1; 8 inches Dec. 8 with drifts; 10 inches Dec. 14 followed by a blizzard and 5 inches, Dec. 28 terminating in sleet with a cold north west wind for a chaser. One year ago the mild weather for the same period was marked contrast.

Contesting Will

The will of William Gregg, better known in Andover, where he was living at the time of his death, as "Billy" Gregg, is contested by his daughters at the court rooms at the County building before Justice J. A. Morrill of the Supreme Court.

Billy Gregg was a prominent horseman in that town, having trained some fine animals. He was also a close friend and protege of Kimball Atwood of New York and had amassed considerable wealth. He was proprietor of a fine estate at Andover, where he had some nice horses and followed the sport of horsemanship for many years.

He was married three times and the will is contested by two daughters, one from the first marriage and the other from the second. They are Marjorie Gregg of Seattle, Wash., and the other, Hortense Gardner Gates, of Black River, N. Y., formerly of Norway.

The bulk of his estate was left to his sisters, Annie and Georgie, who had made their home with him for some time prior to his death. He also gave $2,500 to his housekeeper and $500 to her son, and each of the daughters received $1,000. The total estate was $20,000.

Another action, a bill in equity has been started and will be heard at the close of this trial. This arises from the construction of the will, there being an evident question as to whether or not the portion of the estate that was left to the sisters might have been left in trust with them.

The counsel for the estate is George A. Hutchins and Ralph T. Parker, both of Rumford, and Hon. Alton C. Wheeler appears for Mrs. Gates and Judge Stearns for Miss Gregg. The case will be resumed this morning and will probably take the greater part of the day. There are several witnesses involved on each side of the case.

Mr. Andrews is the son of Georgia and Albert Andrews of South Paris and Mrs. Andrews is the daughter of the late Laura and Frank Bradbury of Norway.

Mr. and Mrs. Andrews left Friday morning for Portland where they spent a few days. Mr. Andrews will return to his work at Keen, N. H., and Mrs. Andrews, for the present, will remain in Norway and keep her position at the Carroll-Jellerson Shoe Co. They plan to take their real wedding trip in their Flivver this coming summer.

Cherished Crooked Remembrance

Crooked as a ram's horn and some more is the cane presented us by Emerson G. Curtis of West Paris. It is so crooked it won't lay on the floor or stand in a corner. It is a much prized addition to our "natural bend" cane industry.

Mr. Curtis found it in the top of a black cherry tree and with painstaking industry smoothed and varnished it for a place among our crooked sticks. To properly describe it we can't. It must be seen. It is at this office.

Mr. Curtis' health is none too good and he is soon to go to Roxbury, Mass., to visit for an indifferent period with his son, Charles Percival Curtis, whose home is in that city.

Mr. Dean will have charge of the public hall at West Paris, which has commenced to be known as "Bates" on the railroad map, during Mr. Curtis' absence.

DOWNWARD COURSE

Fast Being Realized By Norway People

A little backache at first.

Daily increasing 'till the back is lame and weak.

Urinary disorders may quickly follow;

Dropsy and often Bright's disease.

This frequently is the downward course of kidney ills.

Don't take this course. Follow the advice of a Norway citizen.

Mrs. Mary Gammon, 14 Beal St., says: "I have kept Doan's Kidney Pills on hand for years, in fact, ever since I first took them some years ago. The symptoms I noticed at that time indicated kidney complaint. There was a dull heavy ache across the small of my back and often attacks of dizziness came over me. Doan's Kidney Pills which I got from Frank Kimball's Drug Store, proved fine in relieving me of these troubles. I take Doan's off and on now and couldn't wish for anything better to keep my kidneys in good condition."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Gammon had. Foster-Milburn Co., Mfrs., Buffalo, N .Y. 1-2

Shoe Prices

I want to take a little time and some space in this paper, that I may discuss with the readers of this article or advertisement, the shoe situation as it now stands. We will admit that prices are high, much higher than they ought to be, but we do not admit that they are out of proportion to the other necessities of life. I have recently paid $6.00 for a barrel of apples and I am perfectly satisfied with the price and surely believe that they could not be sold for less at a profit. I pay 65 cents per pound for butter, 12 cents a bottle for milk and so on down the list, and the producers are not getting any more than they ought to have for their work.

We have at the present time a store full of footwear of all kinds which we bought and are selling below the market price to-day. Our retail price on more than half our stock is less than we can buy at wholesale. It has always been the purpose and policy of this store to give our customers full value for their money, and this policy has surely been the means of bringing to us a good business which has increased year after year. Our customers have been loyal to us and we surely appreciate it. Now as the holidays are approaching we will suggest that you buy useful gifts and we are sure that footwear of all kinds is always useful and acceptable. We are also positive that we can suit you in style, quality and price.

We are fitting up and expect to have in operation in a few weeks, a modern boot and shoe repair department. We shall have all new and up to date machinery and intend to have as good a repair shop as can be found anywhere.

George Davee will be in charge and that fact is a guarantee that the work will be done right. We shall use the best of stock and our prices will be as low as good work can be done. We shall make a great effort to get the work out promptly. You will be informed when this department is ready for business. Save your repairing for us.

Profiteering

It's the One Great Subject Under Daily Discussion by the Great American Public

And without question in many instances there is just cause for dissatisfaction and protest, for as long as this world exists men will live whose business ideal as they see it, is to get rich quick by squeezing the shekels out of his neighbors' pocket—and on the other hand there are men who seek always to be real merchants and real citizens.

This store welcomes an investigation as to prices; it cares not whether it is Congressional, State, City, Town or otherwise as far as the clothing and other merchandise we sell is concerned.

The legitimate increased cost forced upon us by manufacturers we are compelled to pass along; otherwise our business would be transacted at a loss, but there is a vast difference between this and putting onto our goods an exhorbitant profit. To make both sides of the dollar work for you is our mission. No patron ever left a dollar in this store that did not receive full value in exchange. That's why this store grows, develops and expands with true consistency—that's why we enjoy the enviable reputation of being a leader rather than a follower.

1477.42 Acres of land situated in Oxford County, Maine, Charles H. Adams, Fred H. Bartlett, Admr., E. Chandler Buzzell, George A. Allen, J. Waldo McIntire and others. } No. 570 AT LAW

To the Honorable Clarence Hale, Judge of the District Court for the District of Maine.

The petition of the United States brought by John F. A. Merrill, United States Attorney for said District of Maine, acting under the instructions of the Attorney General and at the request of the Secretary of Agriculture, respectfully shows as follows:

1.

That, by an Act of Congress approved August 1, 1888, (25 Stat. L 357), it is provided:

"That in every case in which the Secretary of the Treasury, or any other officer of the Government has been, or hereafter shall be, authorized to procure real estate for the erection of a public building or for other public uses, he shall be, and hereby is, authorized to acquire the same for the United States by condemnation, under judicial process, whenever in his opinion it is necessary or advantageous to the Government to do so. And the United States Circuit or District Courts of the district wherein such real estate is located shall have jurisdiction of proceedings for such condemnation."

2.

That, by an Act of Congress approved March 1, 1911, (36 Stat. L. 961), among other things it is provided as follows:

"Sec. 3. That there is hereby appropriated for the fiscal year ending June thirtieth, nineteen hundred and ten, the sum of one million dollars, and for each fiscal year thereafter a sum not to exceed two million dollars for use in the examination, survey, and acquirement of lands located on the headwaters of navigable streams or those which are being or which may be developed for navigable purposes; Provided, That the provisions of this Section shall expire by limitation on the thirtieth day of June, nineteen hundred and fifteen.

"Sec. 4. That a commission, to be known as the National Forest Reservation Commission, consisting of the Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, and two members of the Senate, to be selected by the President of the Senate, and two members of the House of Representatives, to be selected by the Speaker, is hereby created and authorized to consider and pass upon such lands as may be recommended for purchase as provided in Section Six of this Act, and to fix the price or prices, at which such lands may be purchased, and no purchase shall be made of any lands until such lands have been duly approved for purchase by said commission.

"Sec. 6. That the Secretary of Agriculture is authorized and directed to examine, locate, and recommend for purchase such lands as in his judgment may be necessary to the regulation of the flow of navigable streams, and to report to the National Forest Reservation Commission on the results of such examination: Provided, That before any lands are purchased by the National Forest Reservation Commission said lands shall be examined by the Geological Survey and a report made to the Secretary of Agriculture, showing that the control of such lands will promote or protect the navigable streams on whose watersheds they lie.

"Sec. 7. That the Secretary of Agriculture is hereby authorized to purchase, in the name of the United States, such lands as have been approved for purchase by the National Forest Reservation Commission at the price or prices fixed by said Commission: Provided, That no deed or other instrument of conveyance shall be accepted or approved by the Secretary of Agriculture under this Act until the legislature of the State in which the land lies shall have consented to the acquisition of such land by the United States for the purpose of preserving the navigability of navigable streams.

"Sec. 8. That the Secretary of Agriculture may do all things necessary to secure the safe title in the United States of the lands to be acquired under this Act, but no payment shall be made for any such lands until the title shall be satisfactory to the Attorney General and shall be vested in the United States."

3.

That the National Forest Reservation Commission provided for in Section 4 of said Act, has been duly appointed and organized in compliance therewith; that the Secretary of Agriculture has examined, located and recommended for purchase the lands hereinafter described which in his judgment are necessary to the regulation of the flow of navigable streams, and has reported to the said National Forest Reservation Commission the result of his examinations; said lands have been examined by the Geological Survey and a report made by the said Geological Survey to the Secretary of Agriculture showing that the control of the said lands will promote or protect the navigable streams on whose watersheds said lands lie; that said National Forest Reservation Commission has considered and passed upon said lands and has approved and recommended the same for purchase or acquisition by the United States, and the funds necessary for the payment for said lands are available when needed and said lands are necessary for the purposes of said Act or Acts.

4.

That the Legislature for the State of Maine in which State said lands lie, has by resolve thereof, approved March 28, 1903, (Resolves of the State of Maine, 1903, Chapter 122) consented to the acquisition of said lands by the United States for the purpose of establishing a National Forest Reserve and for preserving the navigability of navigable streams and the nature character and location of the said lands are within the provisions of the said Act or Acts.

5.

6.

That, by an Act of Congress, approved August 10, 1912, the third section of the Act approved March 1, 1911, referred to in the second paragraph of this petition, was amended in the following language, to-wit:

"And in order to carry out the purposes mentioned in section three of the Act of March first, nineteen hundred and eleven entitled "An Act to enable any state to co-operate with any other state or states, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," there is hereby approvoriated and made available until expended so much of the maximum sums mentioned in said section for the fiscal years nineteen hundred and twelve to nineteen hundred and fifteen, inclusive, and shall remain unexpended at the close of each of said fiscal years."

That the said appropriations contained in Act, approved March 1, 1911, were by said later Act approved August 10, 1912 continued in force until the present time for the purposes therein expressed; and that an additional appropriation now available for the said purposes was made by Act of Congress approved August 11, 1916, in the following language, to-wit:

"That in order to carry out the purposes mentioned in section three of the Act of March first, nineteen hundred and eleven, entitled "An Act to enable any State to co-operate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers." (Thirty-sixth Statutes at Large, page nine hundred and sixty-one), as amended, there is hereby appropriated out of any money in the Treasury not otherwise appropriated, available until expended, the sum of $1,000,000 for the fiscal year ending on the thirtieth day of June, nineteen hundred and seventeen and $2,000,000 for the fiscal year ending on the thirtieth day of June nineteen hundred and eighteen."

7.

The lands which it is necessary for the United States to acquire in this proceedings under judicial process for the purposes hereinbefore set out are situated in Oxford County, Maine, and are known as:

First, the Charles H. Adams tract lying and being in the town of Stoneham and more particularly described as lots 2, 3 and part of lot 1, 3rd range, 2nd division by Nevers, containing according to survey.....	271.48 Acres
Second, the Jonathan Bartlett heirs tract lying and being in the town of Stoneham, being lots 1, 2, 3, and 5 in the 5th range, and lots 3, 4 and 5 in the 4th range, 2nd division by Nevers, Griswold's Gore west of lots 109 and 110, and lot 110, Sherman's 1st Division containing according to survey.....	1001.64 Acres

	1477.42 Acres

The above tracts are more particularly described by metes and bounds in Exhibits "A," "A-1," and "A-2" hereto attached and made a part of this petition with leave to refer to the same as often as may be necessary.

8.

Your petitioner further shows that on or about the 12th day of July, 1918, in pursuance of its powers to procure such land, did, through the Secretary of Agriculture, enter into an agreement with the apparent and presumptive owners of the lands described in Exhibit "A" to wit: Charles H. Adams of North Stoneham, Maine, claiming to be the owner of 255 acres of land, to purchase the same at $7.00 per acre and according to survey the said tract contains 271.48 acres.

Your petitioner further shows that on or about the 5th day of May, 1917, in pursuance of its powers to secure such lands, did, through the Secretary of Agriculture, enter into an agreement with the apparent and presumptive owners of the land described in Exhibit "A1," to wit: Fred H. Bartlett, Administrator of the estate of Jonathan Bartlett, deceased, of Oxford County, Maine, claiming to be the owner of 2800 acres of land in Oxford County, Maine, to purchase the same at $3.00 per acre, and according to survey the tract now to be acquired in this proceeding, contains 1001.64 acres (the other part of the tract having been acquired by direct purchase).

The above agreement of purchase was entered into, however, with the following exceptions and reservations:

Excepting and reserving to the vendor for a period of three years from Sept. 14, 1916, the right to cut and remove the white birch timber from the above described lands lying on lots 1, 2, 3, range 5, Nevers Second Division, lots 3, 4, 5, range 4 Nevers Second Division, Griswold Gore, and lot 110 Batchelder's Grant; Provided that the timber excepted and reserved shall be cut and removed from the said lands on or before September 14, 1919 and the title and ownership of any such timber remaining upon said lands after the above date shall immediately vest in the United States; and Provided, that the cutting and removal of said timber shall be done strictly in accordance with the rules and regulations prescribed by the Secretary of Agriculture attached hereto and made a part of this Agreement; and provided further, that no white birch trees so reserved are to be cut under a 6" diameter limit outside of the bark on the stump, except as provided in the following rules and regulations:

RULES AND REGULATIONS FOR THE CUTTING AND REMOVAL OF RESERVED TIMBER.

1. No unnecessary damage shall be done to any small growth or to trees left standing either in cutting or in the location of millsites, logging roads, chutes, landings or camps.

2. All trees which are cut will be utilized to as low a diameter at the top as possible so as to cause the least waste.

3. Trees of sizes smaller than the diameter limit specified may be cut in connection with regular logging operations for the construction and maintenance of telephone lines, roads, skidways, flumes, slides, and camp buildings, so far as round material may be necessary in connection with the economical conduct of logging operations. Such material shall so far as possible be secured from trees subject to injury in connection with logging or the construction of logging roads and railroads. No material under the specified diameter limit shall be cut or removed for such purposes where unmerchantable material above said diameter limit is available and can be used.

4. All logging road and bridges built and used by the owner of the reserved timber shall become the property of the United States at the termination of the reserved timber rights. All camp buildings and other logging improvements which shall not be removed within one year from the expiration of the reserved timber rights shall then become the property of the United States.

5. While carrying on logging operations the owner of the reserved timber and all his employees, contractors, and their employees at work on the tract shall without any charge or expense to the United States do all in their power to prevent and suppress forest fires upon or threatening their logging operations or the lands upon which the standing timber reserved under this agreement remains uncut. The owner of the reserved timber shall place himself and all his employees at the disposal of the Forest officer in charge for the purpose of fighting forest fires on the lands conveyed by him to the United States, with the understanding that if the fire does not threaten his logging operations or the timber owned by him, he shall be paid for the services so rendered at the rate or rates to be determined by the forest officer in charge, which rate or rates shall correspond to the rate or rates of pay prevailing in the locality for services of a similar character at the time the services are rendered, *Provided*, that if the owner of the reserved timber, his employees, contractors or their employees are responsible for the origin of the fire, then he shall not be paid for services so rendered.

Petitioner further shows that on or about the 1st day of May, 1918, in pursuance of its powers to secure such lands, did, through the Secretary of Agriculture, enter into an agreement with the apparent and presumptive owners of the land described in Exhibit "A2," to wit: E. Chandler Buzzell and Edith M. Buzzell his wife of Fryeburg, Maine, George A. Allen and Ellen M. Allen his wife of Lovell, Maine, J. Waldo McIntire and Annie H. McIntire his wife of Conway, New Hampshire claiming to be the owners of 204 acres of land in Oxford County, Maine, to purchase the same at $8.50 per acre, and according to survey the said tract contains 204.30 acres.

Said vendors covenanted that their title to said lands were clear, free and unencumbered, that they would in two months furnish to petitioner an abstract and other evidence of title. Said agreements further provide:

It is further mutually understood and agreed that, if the vendors do not, within one year from the date of the execution of these agreements, show in themselves a safe title satisfactory to the Attorney General of the United States, to all the hereinbefore described lands or do not, when called upon by the proper officer or agent of the United States, promptly convey said title or titles to the United States, then and in that event the portion or portions of the lands, the vendors title to which has not been proved satisfactory to the Attorney General of the United States, or which the vendors have failed to properly convey to the United States as stipulated and provided herein, shall be acquired by the institution of condemnation proceedings: in which event the evidence to be presented by both parties to this agreement before the appraisers or assessors in condemnation proceedings in estimation of value of said lands, shall be on the basis of an average value of $7.00 per acre for the Charles H. Adams tract, $3.00 per acre for the Jonathan Bartlett estate tract and $8.50 per acre for the Buzzell, Allen and McIntire tract.

9.

That the United States for the purpose of purchasing the said lands, pursuant to the above mentioned agreement, has caused the same to be surveyed and has had an abstract of the title made, and that after an examination thereof the title has been found not to be satisfactory to the Attorney General of the United States, but on the contrary appears to be defective, doubtful and incomplete, and that there are, or may be, unknown, non-resident and persons under disability, who may have some claim or demand on the said lands or some interest or estate therein, which should be divested out of them and be vested in your petitioner in order to give your petitioner a perfect title to said lands; and there may be other persons who are residents who appear to have, or to own, some interest, or estate, or claim in and to said lands, but such persons are so numerous and their estates, interests, or claims, if any, are so vague and uncertain and doubtful, that it is impracticable, to the extent of being impossible, for your petitioner to obtain from all, or from any considerable number of such persons, sufficient deeds of conveyance for their right, or apparent estates, interests, or claims in said lands, wherefore it is not possible for petitioner to acquire said lands by direct purchase, for which reasons and for such other reason as may be hereinafter stated, it is necessary, in order that petitioner may acquire a safe title to said lands, that said lands be condemned for the uses and purposes of petitioner as aforesaid in a court of competent jurisdiction.

H. claim to be the owners of all that tract of land described in Exhibit A-2 hereto attached containing 204,30 acres.

Supplying the best—

Maximum convenience does not mean pushing a bundle into your arms for you to tug home.

Neither does it mean selling you an article "just as good."

When a grocer sells you an advertised, trade-marked brand of goods, whether Canned Goods, Teas or Coffee, you are sure of QUALITY goods at a fair price; and when he delivers your goods into your home with a friendly word, instead of a demand for spot cash, he has given you all the service possible.

Farm Desertion in Stoneham

Commenting on the death of John C. Filse of East Stoneham, Kenneth C. Gurney says his death is the going out of the last farm west of his camp in that town. There is no permanent resident in that section of Stoneham. In the past 16 years at least that number of farms have been abandoned.

He numerates the following that have sold out, left or died: Billy McAllister, George Brown, Austin Warren, David McAllister, Wilbur McAllister, Charles Chaplin, John Barker, Elmer McAllister, Ephraim McAllister, S. W. Johnson, Jonathan Bartlett. There are others whom he does not recall. Three families now live on Birch Avenue. When they are gone the road leading to Bartlettboro can be closed as far as the general public are concerned.

All the shores of Lake Virginia are owned by Ernest Lester Jones of Virginia and Washington, D. C. This water was formerly known as Upper Stone Pond. Raymond McAllister has a hunting camp at the inlet brook. Whether the land was owned by him he did not say.

"Shavey" Noyes' turtle family is active and thriving in their glass residence and growing in stature. If living in an environment prepared for them by nature they would be sleeping away the cold season wrapped in a mud blanket under the ice. The youngsters were hatched last September, their mother being an ancient dame of uncertain age. She has resided many years in the bog above the "falls" at Ward 8 and appears annually in the sandy highway or in gardens adjoining the water to deposit a large string of eggs. The old lady is "touchy" with snapping turtle blood in her veins. She has been captured many times but a violent temper has discouraged any attempt to introduce modern civilization into her prosy life. "Shavey" is giving the family a musical education, they even shed tears when he renders those touching whistling solos.

Nate Dunham recently killed his pig and secured 352 pounds of real pork. Another pig owned by Roscoe Edwards and secured from the same litter dressed 252 pounds. Shorty Cook, president of the Norway 'Swine Club, is authority for the statement that Nate raised a "steam heated pig." MacMILLAN GOING ON ARCTIC TRIP

Donald B. MacMillan of Freeport, who went with Admiral Peary's North Pole expedition as far as the 85th degree of latitude, and who would have accompanied the famous explorer on the final dash to the pole but for frozen feet, has made his first definite announcement in regard to the auxiliary knockabout Bowdoin which he will have built at Boothbay Harbor for making a voyage of discovery along the western shores of Baffins Land. It will be remembered Mr. MacMillan gave a very interesting lecture in the Norway Opera House a short while ago.

The Bowdoin will have a gross tonnage of 55, her principal measurements being 85 feet over all, 22 feet beam and 9 feet, 7 inches draft. The oak planking will be sheathed with greenheart, or ironwood, similar to that used on the Peary craft, Roosevelt, iron plated forward, and with a four-foot belt around her, just above and below the waterline. The explorer wants a craft which will "tread" ice, rather than one which will depend upon cutting through it, and this is what the designer is planning for the Bowdoin.

A 45 horsepower engine will serve as auxiliary to the heavy speed of sails, and with 2,000 gallons of kerosene oil in the tanks, the Bowdoin will have a cruising radius of 3000 miles, it is claimed. "The trouble with the Roosevelt," said Mr. MacMillan, "was that she couldn't carry her own necessary supply of fuel, and Admiral Peary was obliged to take along another craft for that purpose."

Kerosene is especially used as fuel, he says, because he is able to get a supply in the Far North. Mr. MacMillan will penetrate Baffins Land with the best aids to navigation that have yet been discovered, profiting by the mistakes of previous explorers.

Mr. MacMillan also sees the virtue of having a small crew and plans to have only five on this expedition. The Bowdoin's designer says she can carry two year's supplies for five men. The explorer's companions, none of whom has yet been chosen, will be selected with a view to their skill as scientists, as the principal object of the voyage is to obtain scientific and geographical data.

The western shores of Baffins Land constitute 1000 miles of unexplored territory, now designated as a blank. Nearly 100 years ago, two English ships undertook a voyage of discovery there, but after two years of vain attempt were compelled to abandon the task. No white man has ever trod this coast.

Mr. MacMillan proposed to make his dash the latter part of June or early in July, 1921, and hopes to get through the Peary and Hecia straits this season. His departure is not timed earlier for the reason that other explorers have been compelled to make a long wait after reaching the frozen region to the great detriment of their supplies. He has utmost faith in Eskimo assistance, without which Admiral Peary could never have reached the North Pole, he believes.

There is no further object to be attained by again seeking the North Pole, is Mr. MacMillan's opinion. We know from Admiral Peary what the conditions are there. Neither does Mr. MacMillan believe that it is feasible to reach the North Pole by airship and this opinion is born of his own experience in aviation.

"In the first place," said he, "the journey would have to be made by seaplane, and the fields of ice in the Arctic regions are far too rough to permit a landing, even if the airship made the trip safely It could perhaps be done, with a dirigible, but the expense would be prohibitive."

FRYEBURG

Christmas was celebrated as usual with trees at the Congregational vestry and at the New Church hall. CATARRH DOES HARM

Whether It Is of the Nose, Throat, or Other Organs, Get Rid of It.

Catarrh of the nose or throat when it becomes chronic weakens the delicate lung tissues, deranges the digestive organs, and may lead to consumption. It impairs the taste, smell and hearing, and affects the voice. It is a constitutional disease and requires a constitutional remedy.

Take Hood's Sarsaparilla, which by purifying the blood removes the cause of the disease and gives permanent relief. This alterative and tonic medicine has proved entirely satisfactory to thousands of families in three generations.

If there is biliousness or constipation, take Hood's Pills,—they are a thorough cathartic, a gentle laxative.

ESSEX TEST RECORD

The most important event in the annals of the automobile in Maine and New England occurred when the possibilities of the passenger car as a medium of transportation and communication were shown by the trip made by an Essex Touring car from Boston to Fort Kent and return in a non-stop endurance test. The most difficult conditions under which an automobile could be sent over this route were selected in order to prove the possibility of using the automobile under unfavorable conditions in times of emergency. The car was an Essex stock touring car which had driven nearly eight thousand miles before the trip was started. The only extra equipment was cord tires with two extra tires and four chains. During the entire trip official newspaper observers accompanied the car and the distance covered and the time recorded is taken from their records. Leaving Boston at 7:59 p. m. on December 15th the car had an uneventful trip to Portland regardless of the detours encountered and the fact that traffic rules through cities were observed, the car reached Portland at 11:04 p. m. At Portland gasoline was added to the tank and chains were put on for the first time. The next stop was at Augusta which was reached at 1:52 and a chain which had broken was replaced necessitating a stop of three minutes. Bangor was reached at 3:42 making a total running time from Boston to Bangor of seven hours and fifteen minutes. This time over one of the most favorable weather conditions is remarkable, but when it is taken into consideration that the temperature was below zero and that the roads probably were never worse it is almost unbelievable that the distance could be negotiated in less time than the fastest express makes the distance. The road conditions between Augusta and Waterville were found to be deeply rutted and frozen so that the car pitched and tossed from side to side in order to maintain the speed required by the schedule set for it. After a delay of eight minutes at Bangor where more gasoline was taken on and another chain replaced the car started for Houlton at 3:50 a. m. Between Bangor and Houlton the roads were very deeply rutted and glazed with a thin coating of ice.

Thrown from side to side the newspaper reporter stated after arriving in Houlton that he had never experienced such a ride and never wished to again. Three times the car was thrown into the ditch by the deep ruts which zig-zagged across the road through the Mattawamkeag woods. Not once, however, did the motor stop, but with jacks and bushes it was worked back into the road and finally rolled into Houlton at 9:20 Tuesday morning. The thermometer at Houlton registered twenty below zero and here the driver was held until he could be thoroughly warmed up and fed. From this point on a reporter from the Aroostook Daily News accompanied the car. Between Presque Isle and Caribou snow drifts were encountered for the first time and when the car arrived in Caribou it resembled a moving, fleeting, mechanical ghost. Its body and top being covered with a coating of frost and snow. From Caribou to Van Buren and on up the St. John River to Fort Kent over snow and ice-covered roads was an ordeal that few automobiles have ever experienced. This rugged, green Essex Touring Car with its chilled drivers reached the most northern town in Maine at 3:45 p. m.

It had traveled from Boston to Fort Kent over 506 miles of the roughest and most difficult road condition possible in a temperature varying from five to thirty degrees below zero in a little over seventeen hours running time. With a stop of five minutes for gasoline the car started out on its return trip, crowds greeting it as the news quickly spread through the small towns that the Essex was on its way back for Fort Kent. Cheers of interested enthusiasts spurred the chilled drivers and encouraged them as they stubbornly fought against the rugged elements. Reports that many wagers are current and it is said that the enthusiastic supporters of the Essex in Aroostook County profited by their confidence in the car's ability. A short stop at Houlton, and the car was off to Bangor, where it arrived a little after midnight. The record of the official observor showed that the car sped through Augusta at 3:23 Wednesday morning. At exactly 5:12 this game, fighting automobile swept into Longfellow Square where the chains were quickly removed and four minutes later was off over Vaughn Bridge on the last leg of its epoch making journey. At 8:20 Wednesday morning it reached its destination at the office of The Henley-Kimball Company at Boston. 1013 miles this car had covered in a running time of slightly over thirty-two hours and an elapsed time of thirty-six hours and twenty-one minutes. The motor still running after this terrific test was used all that day taking out enthusiastic Essex admirers to confirm their judgement as to the wonderful stability of the Essex.

This endurance record coming as it does only five days after the fifty hour record established by the Essex on the Cincinnati Speedway in which it covered 3,037 miles averaging over sixty miles an hour for the entire distance gives the Essex a reputation for endurance that no other car in its class enjoys.

CATARRH DOES HARM

Whether It Is of the Nose, Throat, or Other Organs, Get Rid of It.

Catarrh of the nose or throat when it becomes chronic weakens the delicate mucous tissues, deranges the digestive organs, and may lead to consumption. It impairs the taste, smell and hearing, and affects the voice. It is a constitutional disease and requires a constitutional remedy.

Take Hood's Sarsaparilla, which by purifying the blood removes the cause of the disease and gives permanent relief. This alterative and tonic medicine has proved entirely satisfactory to thousands of families in these vicinities.

If you are bilious or constipated, take Hood's Pills,—they are a prompt, reliable, gentle laxative.

A word about reading—since Progressive Road system has been used in our schools, reading has become a pleasure, and I want to add that second grade children are almost independently handling stories which two years ago were found difficult, even in third grade.

Our school has earned a large American flag and five small Allies flags, which some day are to float from a flag pole in the school yard.

Thanksgiving was observed by the children and the last week of the term was a busy one, making Christmas gifts for papa and mamma.

The last day happy faces beamed with joy as the little people did their morning work, then hung their play stockings for Santa to fill. The afternoon was devoted to games and songs, after which a march led them to a "mysterious basket," which Santa had left for them during the day. To have seen the smiling faces on their homeward way, was sure proof that they enjoyed the contents.

At the Upper Primary school, Gertrude O. Gardner, teacher, number of pupils enrolled for fall term 34, average attendance 30. Those not absent more than one day:

Paul L. Brown	Merle F. McAllister
Eliott S. Cummings	Walter S. Truman
Elsie Holden	Leona A. McAllister
Edward Littlefield	Dorothy M. Wiles
Charlotte E. Longley	

Last year Gray's number work by Development was introduced in the school. The 1919 class in second grade is ahead of the fall schedule work. Dorothy M. Wiles' rank in her first test in numbers was 100.

The second grade earned a large sized flag one night after school, selling flag pins, also first grade in as short a time the Allies flags. These flags will greet the public as soon as weather permits.

"Tis yours to love! 'Tis yours to serve!
'Tis yours to cherish evermore!
God keep it ever floating there,
The Flag above the schoolhouse door!"

The month of November all morning work, etc., led up to the thought of the "Thank You Day" at the end. The children seemingly understood the theme of the month as they responded generously and a large box of Thanksgiving cheer was sent the sick ones.

Xmas week little hands were busy with special work in drawing and making gifts for papas and mammas. The last day of the term was happily spent with games, treat, etc. As the children were listening to the victor record of "The Visit of St. Nicholas," to great surprise of both teacher and pupils, Santa Claus appeared in the doorway. Such a fine Santa in all details was never seen before! His pack was overflowing with every kind of gifts. On his right arm was a large basket of Northern Spies, which with dancing and prancing and twinkling eyes were quickly given to the children. Then with "a Merry Christmas to all" he was gone. Afterwards such a babble of little tongues was never heard before. Remarks as "Did you see that dear little doll?" "How do you suppose he knew my name?" "Don't you love that man?" "Do you realize that was the first time I ever saw that gentleman?" and "If we keep still perhaps his wife will come," showed his visit to them was truly appreciated and will never be forgotten.

Norway High School

On one of the last days of the term the physical geography class was fortunate in having for a speaker, Robert F. Bickford of this town. Mr. Bickford took for his subject, "Maine Stones," a subject on which he was well able to speak. Mr. Bickford's talk was informal and he began by telling the names and characteristics of minerals in this vicinity. He told the class how they might be recognized and where they might be found. The topic of prospecting was also taken up and Mr. Bickford gave an account of the apparatus needed, giving the whole talk a delightfully personal flavor by telling some of his own experiences. Next he took up gem cutting. In this too, he was able to draw from rich personal experiences. The class was very grateful to Mr. Bickford and appreciated his address.

Woman Suffered in Silence

Health Poor, Beauty Fast Fading Away—Made Believe She was Well

A business woman writes: "There must be lots of women who feel as I did. I suffered in silence many times on account of my pride, but now I know that a good laxative is essential to good health. I neglected my health trying to keep cheery and pretending I was all right when I wasn't. I had terrible pains, was 'grouchy' and my headaches almost killed me with pain, and worst of all from my viewpoint I had a sallow, unbecoming complexion which was not helped by face powders. Why didn't I try to cure myself rather than pretend? After taking Dr. True's Elixir, I now know that a laxative was what I needed. Dr. True's Elixir is mild and pleasant to take, and works just right for me. My complexion cleared up—bright and ruddy—blemishes vanished and every one remarked how much better I looked."
—Mrs. E. J. B., New Auburn, Me.

The root of many of the evils of sickness is the bowels, a very vital part of the human body.

A cold, a fever, diseases or the like can be remedied at once, providing the operation of the bowels is normal—the first and most important relief can be had by giving a Laxative, but be sure it is the proper kind.

Most everybody in these days of quick action and strife, forget their health. The laboring people bolt down their meals, often go to bed right after eating, and wake up in the morning restless, force down a breakfast and then are distressed all day.

An Outdoor Worker says: "I could not puzzle out what made me feel so bad. My good, home-cooked meals didn't even taste good, and I had headaches and was grouchy. I never thought it was constipation, but now I know, for I took four little doses of your Dr. True's Elixir and it fixed me up grand. I will never be without it again in case of constipation."—F. B. B., Allston, Mass.

The bowels need attention first and always. Rich foods, improper cooking, irregular and quick eating, lack of exercise can all be offset providing a mild laxative is taken regularly.

A Business Man Writes: "The continual rush of office details and the short meal hours I get, together with, I think, restaurant foods, has simply knocked my system all to pieces. I felt logy, and had no appetite until I took Dr. True's Elixir, as a Laxative. It is a great thing. No one should neglect their bowels."—Boston Business Man.

Dr. True's Elixir, the Family Laxative and Worm Expeller, with an established reputation since 1851 (over 68 years) has accomplished the seemingly impossible. It has relieved thousands upon thousands of sufferers from constipation, which causes so many terrible disorders.

Dr. True's Elixir will benefit everyone: The laborer who eats heartily and quickly, the office boy or girl who eat "fancies" and irregularly; elderly people who can't digest well and children who suffer from intestinal parasites.

Dr. True's Elixir means a big saving to health and pocketbook. At all druggists. Three sizes, 40c, 60c, $1.00. Buy the large size.

WHAT IS MUSIC?

Real music is the Voice of God
Mind's Symphony complete,
Ideas are notes
And each one floats
To Eternity's rhythmic beat.

'Tis measured in the key of Love,
Life's Infinite concord;
'Tis with Soul's ear
That thou canst hear
This Harmony of God.

Mere sound is but the counterfeit
By mortal sense conceived,
In varied guise
'Twill hypnotize,
Allure, confuse, deceive.

It's shifting standards rise and fall,
To discords 'tis e'er prone,
Now good, now bad,
Now sweet, now sad,
What man can judge of tone?

Arise! incline thine heart to God,
And listen for His voice;
Reflecting Mind,
Thou wilt then find
All music,—and rejoice!

The railways of the United States are more than one-third, nearly one-half, of all the railways of the world. They carry a yearly traffic so much greater than that of any other country that there is really no basis for comparison. Indeed, the traffic of any two nations may be combined, and still it does not approach the commerce of America borne upon American railways.

—*United States Senator Cummins.*

Ask Any Doughboy Who Was "Over There"

and he will tell you that American railroads are the best in the world.

He saw the foreign roads — in England and France, the best in Europe — and in other Continental countries — and he knows.

The part railroads have played in the development of the United States is beyond measure.

American railroads have achieved high standards of public service by far-sighted and courageous investment of capital, and by the constant striving of managers and men for rewards for work well done.

We have the best railroads in the world — we must continue to have the best.

But they must grow.

To the $20,000,000,000 now invested in our railroads, there will have to be added in the next few years, to keep pace with the nation's business, billions more for additional tracks, stations and terminals, cars and engines, electric power houses and trains, automatic signals, safety devices, the elimination of grade crossings — and for reconstruction and engineering economies that will reduce the cost of transportation.

To attract to the railroads in the future the investment funds of many thrifty citizens, the directing genius of the most capable builders and managers, and the skill and loyalty of the best workmen — in competition with other industries bidding for capital, managers and men — the railroad industry must hold out fair rewards to capital, to managers and to the men.

American railroads will continue to set world standards and adequately serve the Nation's needs if they continue to be built and operated on the American principle of rewards for work well done.

OUR VIEWS ON TREATY OF PEACE

The editor of the News and Critic, Laconia, N. H., expresses our views so completely we copy this article:

"It is very important that the senate effect an early compromise on the treaty and covenant. It is quite likely if this is not done it will make no difference in the coming presidential election. One party will blame the other and successfully hold its faithful.

"On the other hand the treaty and covenant should be ratified; that is, we should not withhold our desire to deliberate and advise with Europe, both for the prevention of future wars, which is all important, and also for the promotion of commercial relations between the nations which is very important. All these momentous propositions we are holding back and hindering grievously by delaying ratification.

"President Wilson should not have seen fit to put articles in the covenant that violated our federal constitution which would not be binding unless an amendment was made, which amendment would necessarily have to be adopted by congress and then submitted to the states Then again the needed amendment looks to be mischievous and probably the states would not stand for it. It would mean a lot of delay, anyhow.

"Now Europe declares that she will not oppose our reservations, probably such as the dominant party in the senate proposed, of course not arrogant assertions but neighborly and wise suggestions that will be safe for this western hemisphere to accept.

"We hope this will be carried out and that we can join Europe with intent to help the world by honest and helpful suggestion.

"We want no future wars, and we want to trade; we have never made enemies by our commercial relations. We want the biggest fleet of ships on the ocean flying our flag. Let us plan to build ships and keep the German ships. Let us plan to pay the allies for the ships if we owe for them, but keep the old flag flying on the decks, in fact, instruct the government not to sell any ships."

The same paper though republican takes issue with Senator Geo. H. Moses over the treaty and practically refuses him support for reelection.

The Franklin (N. H.) Transcript Journal has this to say:

"The U. S. Senate ought to be aware by this time that the people want the treaty passed which will legally end the war, and provide a safe league of nations. It was what we fought for, and over a year spent in wrangling, first in arranging terms and then in accepting or rejecting the league is far from satisfactory to the people."

The Rochester (N. H.) Courier is pronounced in its demand for a speedy ratification of the treaty and the League of Nations.

These three are the only New Hampshire republican papers on our exchange list unless possibly the Coos Democrat is republican which is asking their senators to do something and settle the uncertainty.

We are of a notion that the local weekly papers of New Hampshire have more of a political influence than the local papers have in this state. It probably comes from the fact that nearly all the weekly papers of New Hampshire belong to one or the other political parties while most of the weeklies in Maine are purely local in their make up.

Twins Attending Academy

Twins, 14 years of age, who are attending Gould Academy are Doris and Dorothy Goodnow. Both are musically gifted, Doris playing the violin while Dorothy plays the piano. Their duos have given much pleasure to friends.

Both of these young ladies have received a very practical training at home. Each is skilful with the needle and each can cook and can. As members of the canning club last season, both did a considerable amount of work, some fifty pints each. Their mother is Mrs. Sidney Jodrie, upon whom the care of ten children fell, some years ago, the twins being in the number. The youngest at that time was only sixteen months old and the twins as they grew older helped in the care of the younger ones. Their mother's marriage to Mr. Jodrie occurred a few years ago and they have since made their home in Bethel. The sisters, who are now settled elsewhere, are Mrs. Frank Hale of Berlin, N. H.; Mrs. Adele Levy, who is a bookkeeper in Boston; Mrs. Leo Kelley, formerly of Berlin, N. H., and now located in British Columbia; Mrs. Nellie Greene of Boston and Mrs. Maude Bonney of Berlin, N. H.

Samuel R. Faulkner

Samuel R. Faulkner, father of Mrs. William R. Chapman died suddenly at his home in Chicago, Dec. 24th.

Mr. Faulkner had reached the age of ninety-one years and four months, with good physical health and mind as keen as that of a man of fifty. He was apparently in his usual health and was engaged in writing when he passed away. With no sign of illness his pen dropped from his hand and his work ceased.

A large part of his summers have been passed with Mr. and Mrs. Chapman at their Bethel farm and later at the summer home in Shelburne, N. H.

THE LIBERTY CALENDAR

The American Equal Month Calendar Association of Minneapolis, Minn., sends us a card with the following:

"A certain doctor claims our present calendar is a "ferociousmess" and he is exactly right. A more inconvenient arrangement could hardly be conceived. There is no regularity in its construction and its months are of several different lengths.

"We absolutely MUST have a better method of "measuring time" and here it is.

"This new Liberty Calendar will, when adopted by Congress, give us months of exactly four weeks each. This is done in the following manner:

"First, New Year Day becomes an independent legal holiday. It is not included in any week or month.

"Second, another independent legal holiday, called "Correction Day" is provided for leap years. It is not included in any week or month.

"Third, the remaining 364 days are divided into 13 months of exactly four weeks each, every month commencing with Monday.

"Neither the number nor length of our months is governed by the moon or any natural law, hence they can be changed as we see fit. The months in this new form are: January, February, Liberty, March, etc.

"The use of the word "Liberty" is especially fitting, and in more ways than one. The advantages of this form cannot be over-estimated. The saving of time and mental effort would be immense. All holidays and anniversaries would always fall on the same day of the week. A promissory note given for any number of weeks, months and years would always come due on the same day of the week it was given. The plan also provides that Good Friday and Easter Sunday shall always be observed on certain fixed dates. This was contemplated when our present calendar was adopted.

"This splendid simplified form has been approved by the highest authorities. It could be adopted to take effect on Sunday the first day of the 1922, and the change would cause scarcely any jar or friction whatever. A bill has already been introduced in Congress,"
